An Ounce of Prevention is Worth a Pound of the Cure

Now Offering Clinical Trials for Meningitis.

Meningitis can spread easily in kids, teens and young adults due to their close proximity to others in school, college, and dorm settings. Find out more about a meningitis vaccine clinical trial now enrolling.

Those that qualify may:

- ▶ See a medical professional at no cost, no insurance required.
- ▶ Have access to study medication.

Additional criteria may apply

Participants may receive compensation for time and travel.
